

TECHNICAL SHEET THE UNIVERSAL

UNIVERSAL COLORANT

ALL USUAL PAINTS

USE

Coloring of usual paints.

***ANTI-WASTE:** The colorant allows you to tint the necessary quantity and also create customizable shades from white paints or modify an existing shade.

Tip: Start by painting your ceiling white, then tint your paint to use on your walls.

Add a little coloring to enhance your woodwork in the remaining paint.

You can also tint wood varnishes, revamp a piece of furniture by creating your own shade, use it for your creative hobbies and all your decorative work.

Tint to infinity!

The shades indicated are given as an indication and may vary slightly depending on paint qualities. Always test first.

USE

Shake well before use. Pour a small amount of colorant into the desired volume of paint and mix well.

Repeat the operation until you obtain the desired pitch.

5% maximum for a volume of paint to obtain the darkest shade, for example maximum 50ml of colorant for 1L of paint.

All dyes have been developed with technology that allows them to be used indoors and outdoors, depending on the shades*.

Clean with soapy water.

PRODUCT BENEFITS

ANTI-WASTE*

ALL PAINTINGS

EASY TO USE

TECHNICAL INFORMATION

Density: 1.1 - 1.7

Cleaning tools: Water

Consistency: Liquid

Odor: Negligible

Dosage: 5% max. for a volume of paint
